Front end lead engineer, passion
for JS, back end enthusiast,
serverless addict

PROFILE

I am a senior software engineer with good knowledge of front-end techniques and many years of full stack development.

I like every aspect of developing an application, creating a great user experience and a clean code is always a priority for me.

I also like to work on personal projects when I have the time, I'm currently working with ReactJS / NodeJS / AWS

SKILLS

Kubernetes

Webpack

docker

Angular

mongoDB

STRENGTHS

- Leader
- Creative
- Listener
- Team worker
- Quick learner

EDUCATION

2009-2011 Master degree Industrial automation and system engineering
2006-2009 Electronic, electrotechnics, automatic engineering

WORK EXPERIENCE

Senior software engineer

Athena home loans | 2018/11 - Current

I currently work in a team of 10 senior developers. As a full stack engineer I'm working on both back-end and front-end. I mainly work on new features of the react application, bug fixing and various improvements.

CTO

Nod | 2017/08 - 2018/11

In charge of the software engineering team of Nod. My job is to manage the engineering team as well as developing the product and finding the best solutions to improve our product. I manage a team of 5 full stack engineer and 3 data scientists.

As a CTO in a startup I spend most of my time writing code and mentoring our software engineers. I also do regular workshops to make sure everyone has the same skills.

Front-end lead engineer

Dexstr | 2016/01 - 2017/08

Development of new functionalities (AngularJS 1.6 / Java 8)
Task automation (Gulp)

UI/UX improvements (Angular Material, HTML, CSS, postCSS)
Deployment management (Jenkins, AWS, Docker)

In charge of the frontend part of our application, my job is to design and develop the new features to improve our product. I also like to take time to check the quality of the code and take full responsibility regarding the new frameworks that we may use.

Full stack engineer

Decasoft | 2014/10 - 2015/12

Development of an internal reporting tool for Decasoft using a MEAN stack (MongoDB, ExpressJS, AngularJS, NodeJS) in complete autonomy. This tool is now being used by the whole company. This project took 7 months.

I also worked as a consultant for a french hospital and worked with Java / GWT in an agile environment. We were mainly working in TDD.

Full stack engineer

Capgemini | 2011/04 - 2014/10

Web applications edfentreprises.fr edfcollectivites.fr (Java / Oracle DB, Struts)

Maintenance under operational conditions (KSH, PL/SQL scripts)

Technical solutions estimation / Design of technical solutions / Deployments (Jenkins / shell)
